-  Right or left hand discharge to accommodate each farmer's needs.
-  Steerable rear wheels allow for shorter turns.
-  Variable speed hydraulic drive on the rear cross to eliminate bruising.
-  Heavy duty trailing coulter cut the potato vines.
-  Rear wheel lift for steeper angles on the primary and secondary for improved cleaning.
-  Longer machine for more efficient cleaning of the potatoes. (554XTS model)
-  Digger nose available in narrow or wide.
-  Available in center pull or offset hitch.
-  Heavy-duty spindles, hubs and rims for longer life.

Potatoes are about 80% water.

Hydraulic rear lift available.

Right or left hand discharge to accommodate each farmer's needs.
